PROFILE

I am a front-end developer who previously completed a diploma in mechanical engineering. I worked in a different field but not a creativity job. This field lacked the creativity I desired, so I made the decision to leave that job. I find front-end development to be a highly creative and interesting field, and I have completed my training in front-end developer languages. I interest more languages and AI technology.

PERSONAL PROJECT

- **BookMyShow** using React Js,
